

Step 1 — Independent elicitation

Author 1
Element set A

Author 2
Element set B

Author 3
Element set C

Step 2 — Structured consolidation (NGT discussion)

Joint discussion session
Compare A $\cap$ B $\cap$ C · resolve disagreements by failure-mode criterion · 71.4% initial agreement

Consolidated element set
7 elements · each traceable to a failure mode

Step 3 — Prompt construction & internal verification

Author 1 constructs prompt
Encodes all 7 elements per design rationale

Author 2 reviews
Checks coverage & ordering

Author 3 reviews
Checks coverage & ordering

Step 4 — Cross-author validation

Remaining authors validate
Scope completeness · ambiguity check

Finalized & frozen system prompt
Released in RevMine open-source repository
